

Prerequisites

Before submitting, ensure the following:

1. **Your desired AI platform** is downloaded and set up
 2. **Git is installed and configured on your system**
→ Refer: [Set up Git](#)
 3. **You have an active GitHub account**
→ If you want to create a new account, refer to: [Create a GitHub Account](#)
-

Important Rules

- *You have a maximum of 3 submission attempts*
 - *The repository size must be less than 10 MB*
 - *The GitHub repository must be public*
 - *The repository should contain **only one branch** (no multiple branches allowed)*
-

Steps to Make a Submission

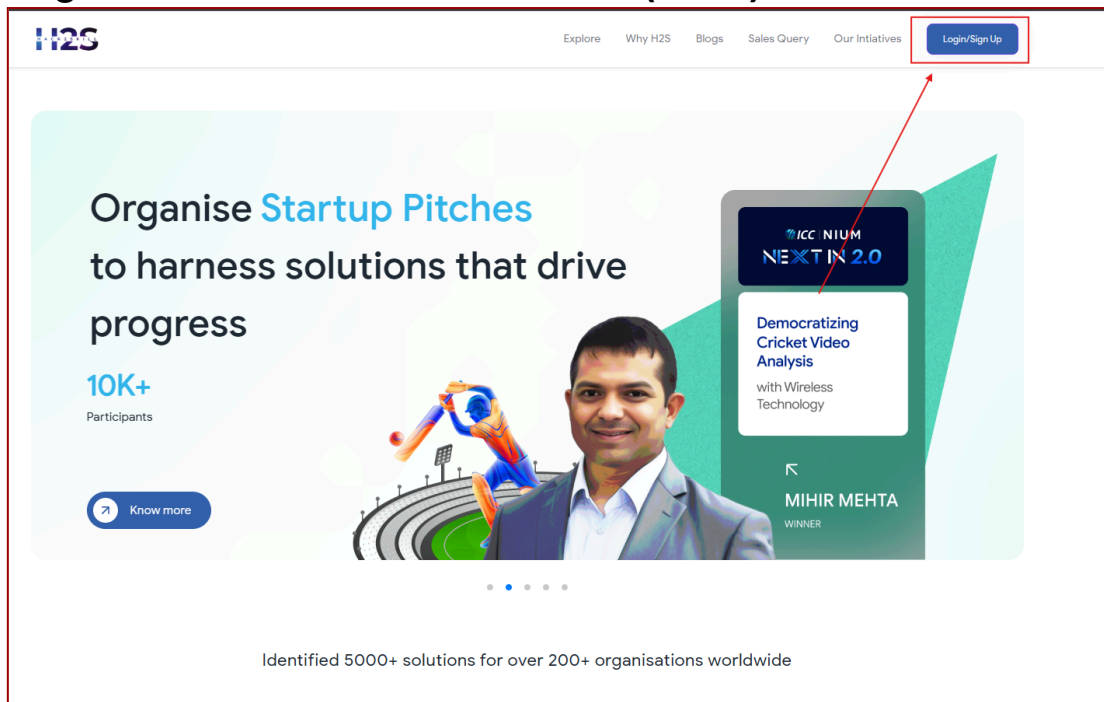

1. Go to **GitHub** and create a **new repository**
 - **How to guide refer:** [Creating a new repository - GitHub Docs](#)
 - Ensure the repository is **public**
2. Open **the desired AI platform**
3. **Clone the GitHub repository** inside AI platform
4. Start **prompting and coding** using your AI platform
5. Once satisfied with your progress:

- **Push your code** to the GitHub repository
- Ensure there are **no multiple branches** (all work should be in a single branch)

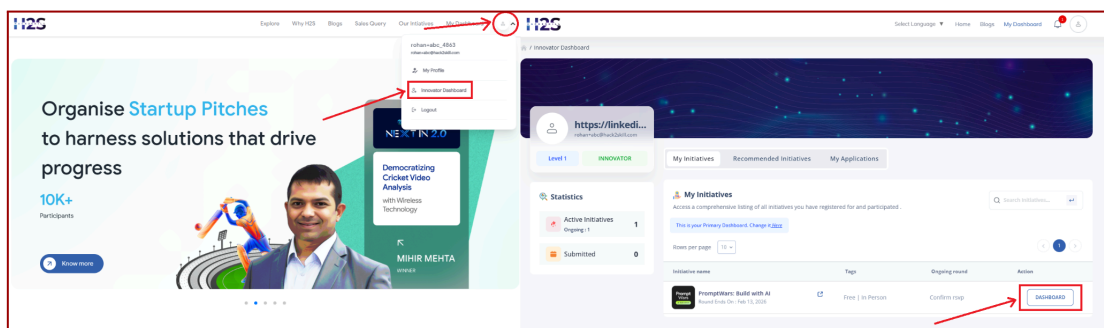

6. After pushing the code:

- Copy the **public GitHub repository link**

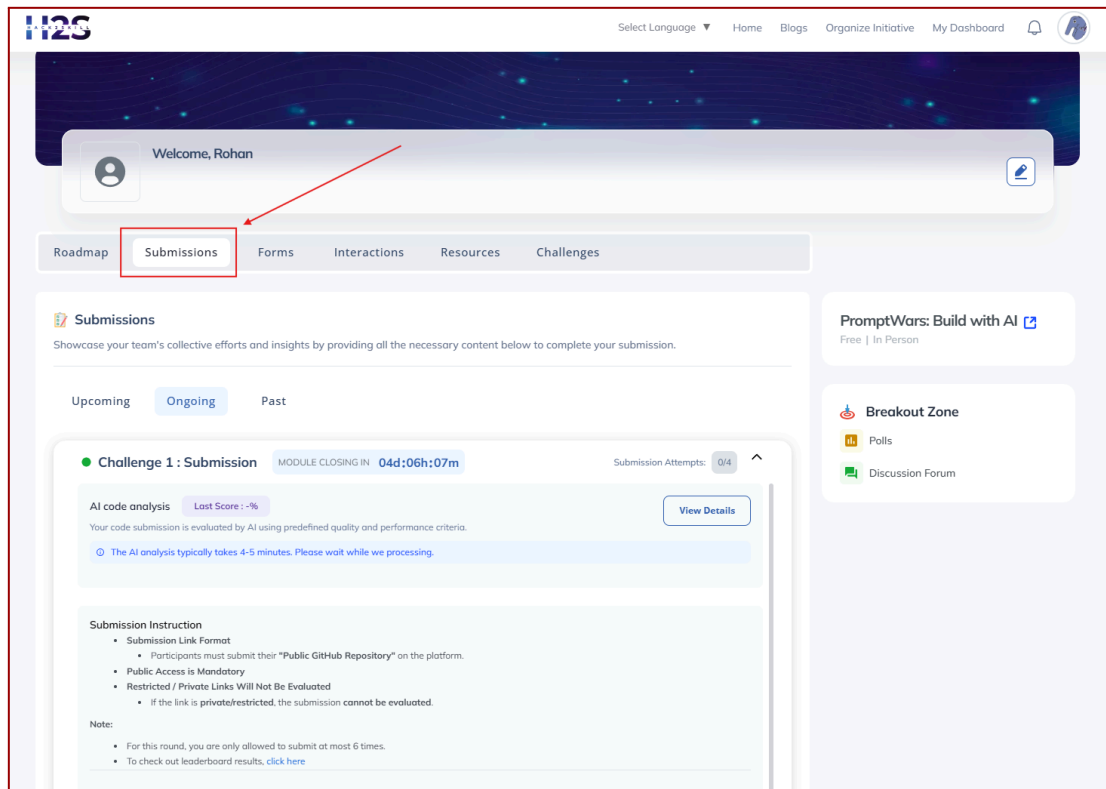

7. Log in to the **Hack2skill Portal** ([Link](#))

8. Navigate to the **Prompt Wars Dashboard**

9. Go to the **Submissions Tab**

10. Scroll down slightly to see the submission fields and the submit button
